KRISHNA KAUSHIK

Kaushik4294cse@gmail.com | +91-8954760783 | www.linkedin.com/in/krishna-kaushik-ml

Objective

Software Engineer moving into Machine Learning, with hands-on experience building and evaluating ML and deep learning models and GenAI prototypes alongside full-stack development in Python, PyTorch, Java and PHP. I enjoy taking AI beyond the notebook and turning it into real, production-ready applications.

WORK EXPERIENCE

1. **Marquis Technologies** — **Onsite, Noida [India]**
   Software Engineer — *Feb 2026 - Present*
   - Developed and maintain Marquistech's internal Travel & Claim Portal, a web platform where employees manage travel advances, expense claims, flight and hotel bookings, and company vehicle tracking. Build new features and fix issues to keep approvals and reimbursements fast, accurate and easy to use.
   - Designed and maintain scalable backend services and RESTful APIs using Spring Boot for an internal tool that generates test plans for GCF and PTCRB device certification. Manage the database of specification data and test cases that drives test plan generation, ensuring data integrity and efficient retrieval.

2. **GirlScript Foundation** — **Remote, India**
   Open-Source Contributor at GSSOC — *May 2024 - Aug 2024*
   - Developed detailed content on the Python data science library *Pandas*, supporting learners in mastering data manipulation and analysis.
   - Created an introductory guide on *PyTorch*, enabling beginners to understand foundational deep learning concepts.
   - Designed and implemented a module on *PyTorch fundamentals*, covering tensor operations and optimizing performance with GPU support, resulting in enhanced comprehension and skill-building for learners.

3. **Arvy Consultancy (UK) Limited** — **Remote, England [UK]**
   Machine Learning Intern — *July 2025 - Aug 2025*
   - Worked on **data preprocessing**, implementation of basic **ML algorithms**, and contributed to the development, testing, and documentation of AI-based solutions.

EDUCATION

1. **RAJA BALWANT SINGH ENGINEERING TECHNICAL CAMPUS** — **Uttar Pradesh, India**
   Bachelor of Technology, Computer Science | 7.9 CGPA — *Nov 2022 – May 2026*

2. **Global Agra Convent School (CBSE)** — **Agra**
   Intermediate | 82% — *2021*

PROJECTS

Document Q&A RAG System
- Built a retrieval-augmented generation pipeline using **LangChain** to answer questions over user-uploaded **PDF/Word/text** documents, using fixed-size chunking and **FAISS** for vector similarity search over document embeddings
- Served responses via a **locally-hosted** open-source **LLM (Ollama)**, avoiding reliance on paid API access
- Developed a **Streamlit** front end supporting multi-format document upload and interactive Q&A, making the pipeline usable end-to-end without command-line interaction

Heart-Disease-Classification[GitHub]
- Trained a Classification Model that can predict whether or not the patient has a heart disease based on the patient's attributes.
- Achieved an accuracy of **92%** with **Logistic Regression** (**with tuned hyperparameters** using **GridSearchCV**).

SKILLS

Machine Learning: Regression, Decision Trees, Random Forests, hyperparameter tuning (GridSearchCV)
Deep Learning: PyTorch (tensor operations, GPU-accelerated training)
Data & Analysis: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Programming Languages: Python, Java, PHP, SQL
Software Engineering: REST APIs (Spring Boot, Laravel), Git/GitHub, SQLite

Certifications and Achievements

- Machine Learning Specialization (Stanford University)
- Mathematics for Machine Learning Specialization by Imperial College London (Coursera)
- Complete A.I. & Machine Learning, Data Science Bootcamp (Udemy)
- Postman API Fundamentals Student Expert certification
- Python Programming (GUVI Geek Networks, IITM Research Park)
